

Flat Foam Pads 115mm x 115mm

FFP

Matting becomes an easy, comfortable job with this foam backing pad. The sanding grit is no longer applied on a paper backing but directly glued into the foam. The result is astonishing: faster matting than with traditional scuff rolls solutions, finer than with foam backing abrasives, more flexibility to get access to the smallest corners and water absorbing!

01 Holds liquid, so easy to dose.

The FFP can be used dry, but performs better in combination with mattening paste, water based degreaser or just water. Combined with water based degreaser, the panel is matted and degreased in one single application. Due to the special foam holding the liquid, one can easily adjust the amount that should be released and adapt during the application.

02 Easy access to difficult areas with maximum sanding comfort.

Due to the foam backing, the FFP has the flexibility to reach more difficult spots or harder to sand areas without tearing or losing its strength. At the same time, the flat foam pad offers a comfortable sanding method perfect for every finish.

03 No risk of sanding through or leaving behind marks

The calibrated FFP grits will result in an even and finer finish on the sanding area whilst traditional papers and/or scuff rolls can leave irregular sanding marks.

04 Perfect for blending - eliminates the need for unnecessary polishing.

Whether it is applying primer, or finishing up, the FFP eliminates the need for extra sanding and unnecessary polishing.

Code	Description	Box	Overdoos
FFP 0320	Flat foam pad - 150 x 150mm - Primer prep	50	4
FFP 0500	Flat foam pad - 150 x 150mm - Base coat prep	50	4
FFP 0800	Flat foam pad - 150 x 150mm - Clear coat prep	50	4
FFP 1500	Flat foam pad - 150 x 150mm - Clear coat fade out	50	4
